

St. Mary offers free of charge a high-speed public wireless network for our patients, friends and families.

The St. Mary public wireless network is available as the wireless network named "Guest". Any wireless enabled device with Internet browsing capabilities should be able to locate and connect to this wireless network

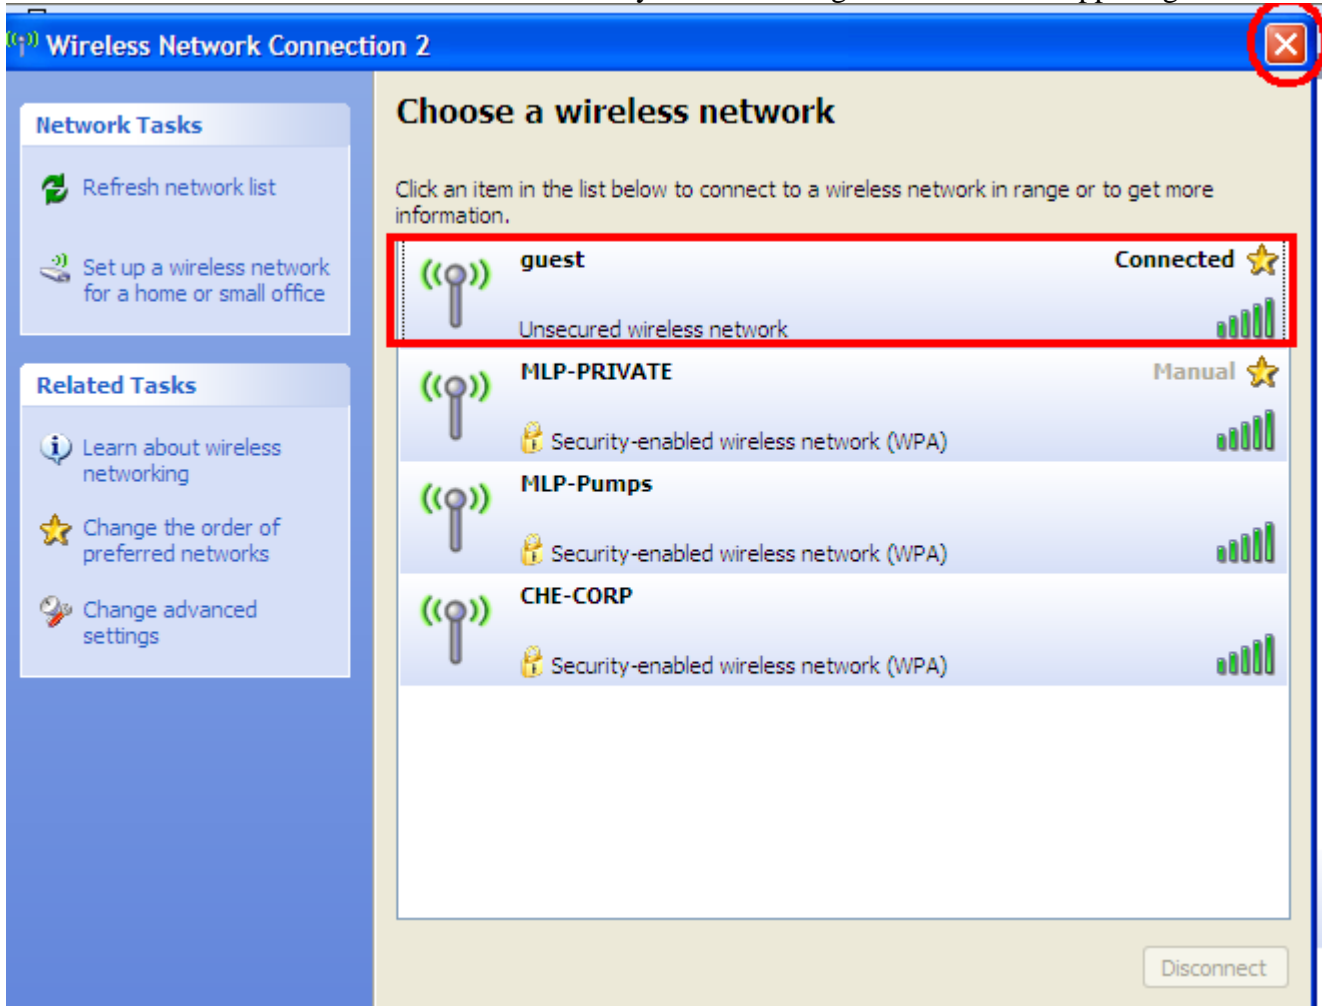

Please wait while your computer connects to the guest wireless network

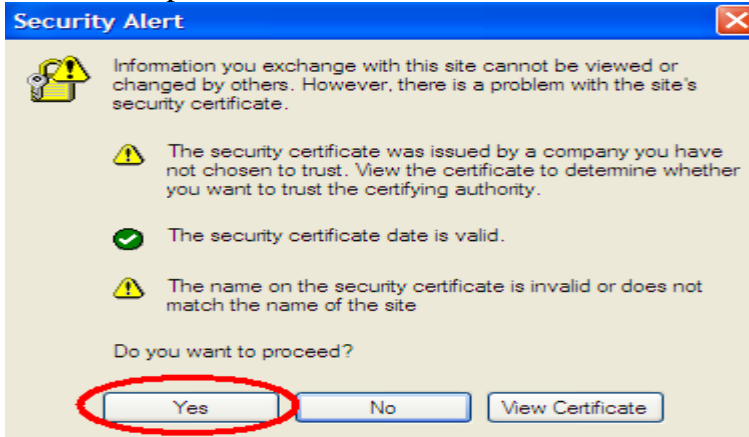

Once connected, the guest wireless network should show connected.
Close the Wireless Network Connection screen by LEFT clicking the red X in the upper right corner.

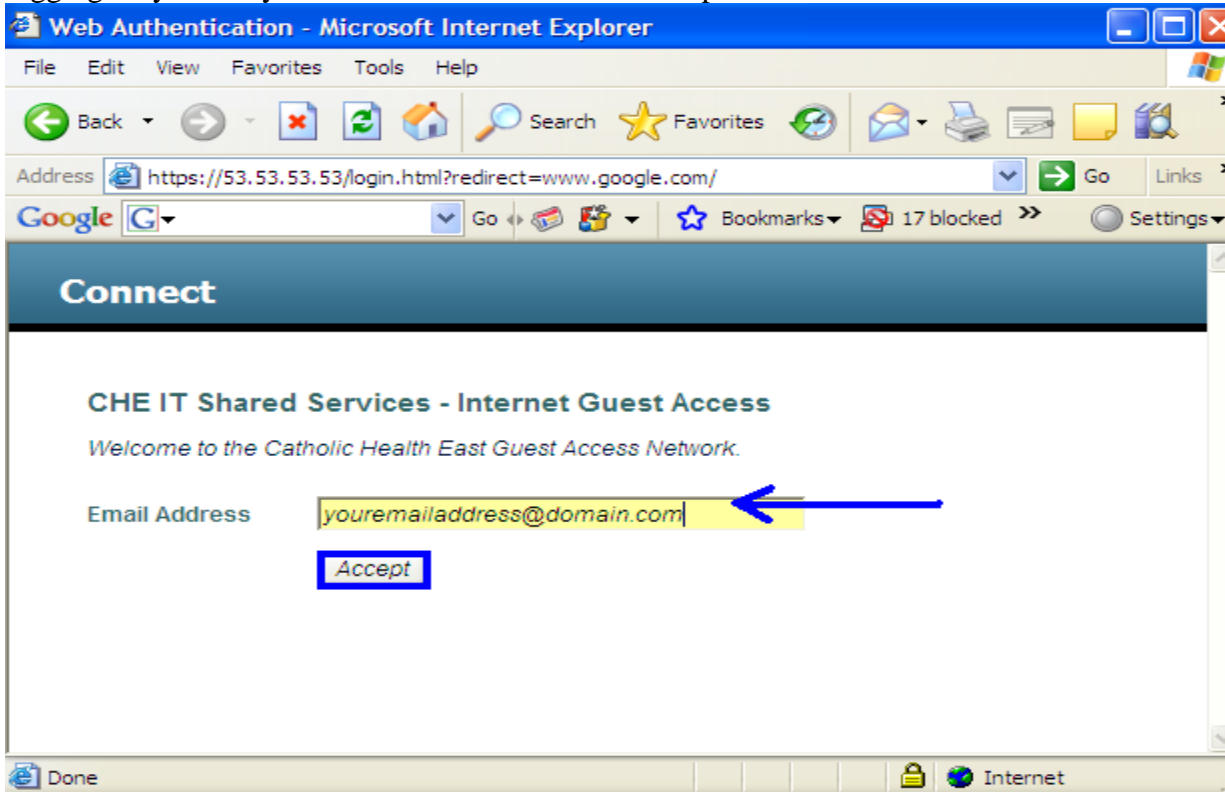

You can now launch your Internet browser.

Depending on your browser's security settings, you may receive the following Security Alert, simply LEFT click Yes to proceed.

Next, you will be brought to the Web Authorization where you will be asked to enter you email address. This is for authentication purposes and the email address is not shared with any other entity. It is for usage and access logging only. Enter your email address and click Accept.

You should now be online and can browse the Internet. St. Mary does utilize safe surfing tools to guard against spyware and virus' and inappropriate web site access.
